

XTREME

THE EFFICIENCY EXPERT

This smart, high-performance boiler is one of the most environmentally-savvy boilers on the market today. Packed with energy-saving features like its built-in passive flue gas heat recovery unit, the Xtreme keeps CO₂ emissions to the absolute minimum while lowering energy bills.

Like the Xclusive, it also emits the lowest amount of NO_x of any boiler on the market today (between 17.06-20.33mg/kWh, depending on the model). And, with a flow rate of between 11-14.5 l/m and twin OpenTherm outlets, extreme energy efficiency is guaranteed.

If you fit an Intergas System Filter when you install any of our boilers, we'll add two more years to the warranty!
